

Victims

FM
HBV
FGM

Women and girls who experience honour based abuse, forced marriages & FGM need to trust services they engage with.

Emergency & Crisis Care

Crisis intervention often means they receive emergency help to escape violence and harm. After which they are left alone, without support and face further vulnerability due to the isolation.

I Dream...

I Aspire...

Halo Virtual Angels will provide a specialist information and web based application service which has been tailored for victims of HBV, FM & FGM to help them keep safe, seek opportunities in their local areas to lead fulfilled lives and realise their potential.

I Achieved...

Local area support hubs / action plans and access to Virtual Halo Angels (survivors who have experienced similar experiences and who are aware of the cultural and language barriers) will provide mentoring and support for women and girls so they can truly reach their potential.
